

Peer Review Worksheet

Make a private copy of this worksheet and give it a useful filename. Be sure to upload the worksheet in PDF format as an in-class activity and provide a copy to the group you are evaluating. Only evaluate work that has been completed (but note incomplete items in the findings as appropriate). Include the worksheet you receive in your own homework submission.

Homework Number:	#2
Your Group Number and Members:	Iver
Group Number and Members to Evaluate:	Andrew

Review Item (in decreasing order of grade weight)	Finding(s)	"Minor" or "Major"?
Does the code seem to work correctly with expected input and give sensible output?	#1 & #2 run and produce results. #3 has not been done yet. Results for 2's are producing higher values for i than what I found. (i=32)	Minor
If applicable, does the code seem to handle invalid input? Is there a usage message?	Code runs for any input values given. 22 will run for irrational #'s, but will run for a long time without producing results.	Minor
Are the answers to questions readable and well organized? If not, make suggestions.	Answers are outputted. Maybe make more elaborate print statements that explain the results more clearly?	Minor
Are all the plots appropriately labeled and readable? If not, make suggestions.	Plots are created and labeled. Need code for center-der. w/ plot, but extremely minor with no concerns	Minor

Can the code documentation be improved (including comments and file headers)?	Well documented and commented. Be sure to comment for question 3 to the same level as #1 & #2.	Minor
Can the code readability be improved? Give suggestions.	Produce the same readability for Q3.	Minor
Does the code seem efficient in style and performance? If not, what is the concern?	Print statements can be revised to be more efficient in Q2b	Minor
Does the submission contain a descriptive README file?	No readme file.	Major
Were you able to compile/run the code according to the instructions in the README?	N/A	N/A
Does the submission appear to otherwise meet requirements and not contain unnecessary files? If not, explain.	Yes	Minor

How many minor issues did you identify?	8
How many major issues did you identify?	1
